FOI.21499 - Attachment 1

1 The UHB is unable to provide you with the information exactly as requested, due to patients having a single point of entry via the Accident and Emergency (A&E). However, a patient can move between A&E and a Minor Injuries Unit (MIU) area, more than once during their visit. Therefore, the UHB provides within the table below, the number of patients that attended an A&E department (including MIU) at either Withybush General Hospital (WGH), Bronglais General Hospital (BGH) or Glangwili General Hospital (GGH) each day, during the period 1 May to 31 August 2026.

Date	Number	Date	Number	Date	Number

Total			**48,871**		

Please note: Prince Philip Hospital (PPH) data is not included within the table above, due to there being no A&E department. Additionally, the data in the table above excludes those patients that were scheduled reattenders or recorded as deceased on arrival.

2 The UHB confirms the average wait time from a patient's arrival at A&E to their discharge was approximately six (6) hours, during the period 1 May to 31 August 2026.
