### ADRODDIAD SCAA SBAR REPORT

#### Sefyllfa / Situation

The Committee is asked to request assurance from the lead Executive Director for the People, Organisational Development & Culture Committee (PODCC) that the corporate risks in the attached report are being managed effectively.

#### Cefndir / Background

Effective risk management requires a 'monitoring and review' structure to be in place to ensure that risks are effectively identified and assessed, and that appropriate controls and responses are in place.

(Risk Management Process, ISO 31000)

The Board's Committees are responsible for the monitoring and scrutiny of <u>corporate level</u> risks within their remit. They are responsible for:

Seeking assurance on the management of principal risks on the Board Assurance
Framework (BAF)/Corporate Risk Register (CRR) and providing assurance to the Board
that risks are being managed effectively and report areas of significant concern, for
example, where risk appetite is exceeded, lack of action, etc.

Page 1 of 7

- Reviewing principal and operational risks over tolerance and, where appropriate, recommend the 'acceptance' of risks that cannot be brought within Hywel Dda University Health Board's (HDdUHB) risk appetite/tolerance to the Board.
- Provide annual reports to Audit and Risk Assurance Committee (ARAC) on the effectiveness of the risk management process and management of risks within its remit.
- Identity through discussions any new/emerging risks and ensure these are assessed by management.
- Signpost any risks outside of its remit to the appropriate HDdUHB Committee.
- Use risk registers to inform meeting agendas.

These risks have been identified by individual Directors via a top down and bottom up approach and are either:

- Associated with the delivery of the Health Board objectives; or
- Significant operational risks escalated that are of significant concern and require corporate oversight and management.

Each risk on the CRR has been mapped to a Board level Committee to ensure that risks on the CRR are being managed appropriately, taking into account the gaps, planned actions and agreed tolerances, and to provide assurance to the Board through their update report on the management of these risks.

The Board has delegated a proportion of its role of scrutiny of assurances to its Committees to make the most appropriate and efficient use of expertise. Therefore, Committees should also ensure that assurance reports relevant to the principal risks are received and scrutinised, and an assessment made as to the level of assurance it provides, taking into account the validity and reliability i.e. source, timeliness, methodology behind its generation and its compatibility with other assurances. This will enable the Board to place greater reliance on assurances, if they are confident that they have been robustly scrutinised by one of its Committees; and provide them with greater confidence regarding the likely achievement of strategic objectives, as well as providing a sound basis for decision-making. It is the role of Committees to challenge where assurances in respect of any component are missing or inadequate. Any gaps should be escalated to the Board.

The process for risk reporting and monitoring within the Health Board is outlined at Appendix 1.

#### Asesiad / Assessment

The PODCC Terms of Reference reflect the Committee's role in providing assurance to the Board that principal risks are being managed effectively by the risk owners (Executive Leads).

The Terms of Reference state that:

- 2.6 To seek assurance on the management of principal risks within the Board Assurance Framework (BAF) and Corporate Risk Register (CRR) allocated to the Committee and provide assurance to the Board that risks are being managed effectively and report any areas of significant concern e.g. where risk tolerance is exceeded, lack of timely action.
- 2.7 To recommend acceptance of risks that cannot be brought within the Health Board's risk appetite/tolerance to the Board through the Committee Update Report.
- 2.8 To receive assurance through Sub-Committee Update Reports and other management group reports that risks relating to their areas are being effectively managed across the

whole of the Health Board's activities (including for hosted services and through partnerships and Joint Committees as appropriate).

There is <u>one-1</u> risk currently aligned to PODCC (out of the 18 that are currently on the CRR) as the potential impacts of the risks relate to the workforce. This can be found at Appendix 2.

#### **Changes Since Previous Report**

| Total Number of Risks     | 1 |
|---------------------------|---|
| New risks                 | 1 |
| De-escalated/Closed       | 1 |
| Increase in risk score ↑  | 0 |
| No change in risk score → | 0 |
| Reduction in risk score ↓ | 0 |

See Note 1 See Note 2

#### Note 1 – New risk

Since the previous report, the following risk has been added to Datix:

| Risk<br>Reference &<br>Title  | Date risk identified | Lead<br>Director                 | Current risk score            | Update   | Target<br>Risk<br>Score |
|---|----------------------|----------------------------------|-------------------------------|--|-------------------------|
| Insufficient skilled workforce to deliver services outlined in the Annual Plan 23/24 and deliver UHB strategic vision by 2030 | 26/04/23             | Director of<br>Workforce<br>& OD | 4x4=16<br>(Reviewed 26/04/23) | This was approved by the Executive Risk Group in May ahead of Board on 25 May 2023. The risk has been scored as 16 (the likelihood is "likely" and has the potential to have a "major" impact) as the number of staff impacted from staff sickness is still high at April 2023 compared to prepandemic levels (c2-3% higher). However, there has been a general improvement over the previous 12 months. Staffing levels (acute & community) continue to operate below established levels due to both vacancies and sickness/absence, and use of bank and agency. There is still a significant risk of workforce misalignment with activity and required competence levels. Further work has been undertaken to understand the level of risk across each staff | 3x4=12                  |

| group, speciality and site to fully comprehend the |  |
|--|--|
| level of risk the                                  |  |
| organisation carries as a                          |  |
| whole. It is hoped as                              |  |
| further action is taken                            |  |
| through stabilisation,                             |  |
| Improving Together and                             |  |
| workforce planning to                              |  |
| reduce the risk score                              |  |
| during 2023/24.                                    |  |

### Note 2 - Closed risks

Since the previous report, the following risk has been closed:

| Risk<br>Reference &<br>Title   | Date risk identified | Lead<br>Director                 | Current<br>risk score                | Reason for risk closure or removal  | Target<br>Risk<br>Score |
|--|----------------------|----------------------------------|--------------------------------------|---|-------------------------|
| 1406 - Risk of insufficient skilled workforce to deliver services outlined in Annual Plan 22/23 & deliver UHB strategic vision by 2030 | 01/04/22             | Director of<br>Workforce<br>& OD | <b>4x4=16</b> (Date closed 26/04/23) | Risk now superseded by<br>1649 (above) - Insufficient<br>skilled workforce to deliver<br>services outlined in the<br>Annual Plan 23/24 and<br>deliver UHB strategic<br>vision by 2030 for the<br>current financial year | 3x4=12                  |

Risk owners can allocate themes to their risks, which allows the Health Board to share risk information on specific areas with relevant experts as part of the <a href="second2">second2</a><sup>nd</sup> line of defence. Risk themes provides assurance that a holistic approach to risk management is undertaken, and enables the Health Board to better identify the risk appetite, risk capacity and total risk exposure in relation to each risk, group of similar risks, or generic type of risk.

Workforce themed risks are shared with the Workforce and Organisational Development Directorate on a bi-monthly basis to allow them to maintain oversight and provide necessary guidance to those responsible for the risk and develop/improve organisational controls, i.e. policies, procedures, systems, processes, to reduce the risk to the Health Board. The Assurance and Risk Team are currently requesting theme leads to provide assurance of the review of themed risks.

#### **Argymhelliad / Recommendation**

PODCC is asked to seek assurance that:

- All identified controls are in place and working effectively.
- All planned actions will be implemented within stated timescales and will reduce the risk further and/or mitigate the impact, if the risk materialises.
- Challenge where assurances are inadequate.

This in turn will enable PODCC to provide the necessary assurance (or otherwise) to the Board through its Update Report, that the Health Board is managing these risks effectively.

# RISK ASSESSMENT - FREQUENCY OF REVIEW

| RISK SCORED | DEFINITION | ACTION REQUIRED (GUIDE ONLY)   | MINIMUM REVIEW FREQUENCY   |
|-------------|------------|--|--|
| 15-25       | Extreme    | Unacceptable. Immediate action must be taken to manage the risk. Control measures should be put into place which will have an effect of reducing the impact of an event or the likelihood of an event occurring. A number of control measures may be required. | This type of risk is considered extreme and should be reviewed and progress on actions updated, at least monthly.          |
| 8-12        | High       | Very unlikely to be acceptable. Significant resources may have to be allocated to reduce the risk. Urgent action should be taken. A number of control measures may be required.  | This type of risk is considered high and should be reviewed and progress on actions updated at least bi-monthly.           |
| 4-6         | Moderate   | Not normally acceptable. Efforts should be made to reduce risk, providing this is not disproportionate. Establish more precisely the likelihood & harm as a basis for determining the need for improved measures.  | This type of risk is considered moderate and should be reviewed and progress on actions updated at least every six months. |
| 1-3         | Low        | Risks at this level may be acceptable. If not acceptable, existing controls should be monitored & reviewed. No further action or additional controls are required.   | This type of risk is considered low risk and should be reviewed and progress on actions updated at least annually.         |

#### Rationale for CURRENT Risk Score:

This risk has been scored as 16 (the likelihood is "likely" and has the potential to have a "major" impact) as the number of staff impacted from staff sickness is still high at Apr23 compared to pre-Covid levels (c2-3% higher) however, there has been a general improvement over the last 12 months. Staffing levels (acute & community) continue to operate below established levels due to both vacancies and sickness/absence, and use of bank and agency. There is still a significant risk of workforce misalignment with activity and required competence levels. Further work has been undertaken to understand the level of risk across each staff group, speciality and site to fully comprehend the level of risk the organisation carries as a whole. It is hoped as further action is taken through stabilisation, Improving Together and workforce planning to reduce the risk score during 2023/24.

#### Rationale for TARGET Risk Score:

199, 523, 1238, 200, 180, 1245, 1224, 1309, 1152, 1211, 105, 119, 118, 1305, 1295, 1377, 842, 138, 153, 156, 939, 940, 1409, 1419, 628, 1316,

1317, 340, 1301, 1663

The Target Risk score indicates the likelihood of the risk occurring (absence continues to be high at c7% but lower than peak at 12% but has not returned to pre-pandemic levels of c5%). Other intelligence leads as to be alert to workforce issues as evidence suggests that patient acuity is increasing and therefore workforce requirements will increase by proxy until new models/methods to reduce or manage complexity can be identified. Also, it may be that there could be concerns for the specific services and/or the annual risk of a winter surge developing when at full capacity for recovery/ministerial priorities as we have a "finite" resource in our people that can only be stretched so far without causing detriment. Therefore, the probability sits between 75-90% when taking account of multiple factors - respiratory infections, increased patient acuity, the longer term impacts of COVID-19 on the population i.e. inability to access services needed, and workforce resilience. We hope we will be able to take mitigated actions noted below predominantly through our interventions under the Regeneration Framework in the short term and for the medium to long term begin to realign available workforce to new service design and models of care. This risk is wider than a 12 month period as actions taken or not taken today will have a long term legacy on our available future workforce and capacity/capability to manage the associated challenges of service & workforce redesign.
