STRATEGIC DEVELOPMENT AND OPERATIONAL DELIVERY COMMITTEE

DYDDIAD Y CYFARFOD: **DATE OF MEETING:**	21 December 2023
TEITL YR ADRODDIAD: **TITLE OF REPORT:**	Corporate Risks Assigned to Strategic Development and Operational Delivery Committee (SDODC)
CYFARWYDDWR ARWEINIOL: **LEAD DIRECTOR:**	Andrew Carruthers, Director of Operations Lee Davies, Director of Strategy and Planning
SWYDDOG ADRODD: **REPORTING OFFICER:**	Charlotte Wilmshurst, Assistant Director of Assurance & Risk

Pwrpas yr Adroddiad (dewiswch fel yn addas) **Purpose of the Report** (select as appropriate)
Er Sicrwydd/For Assurance

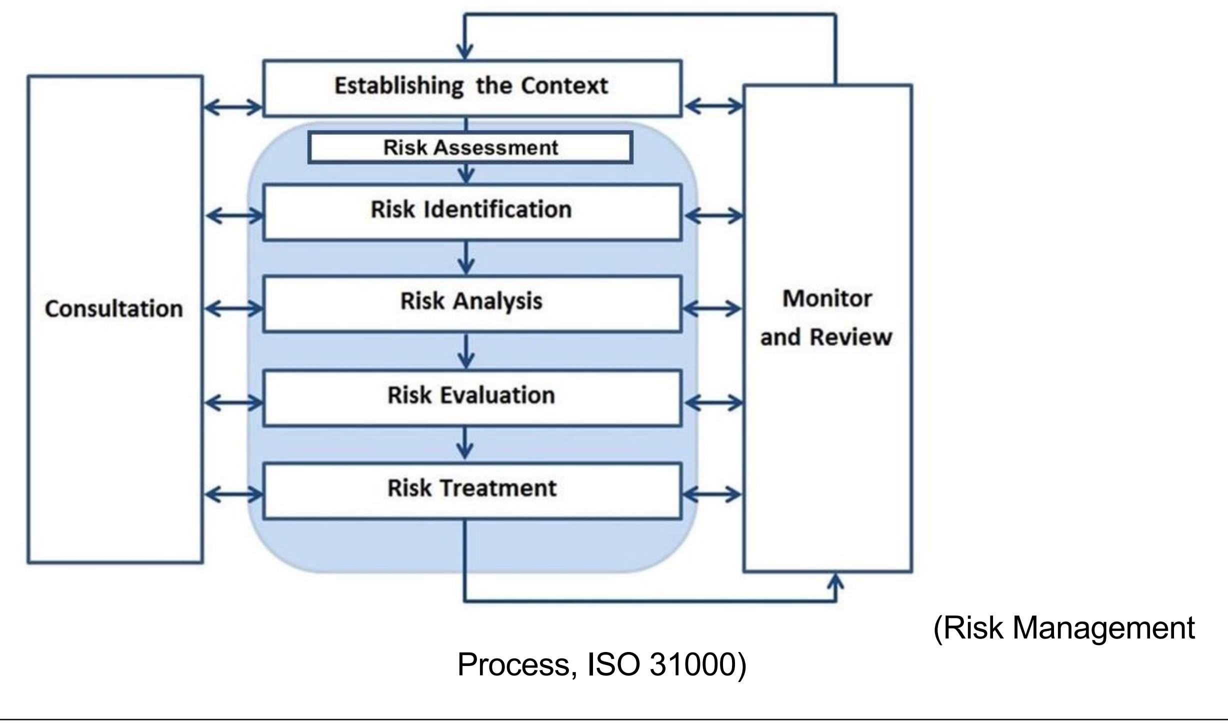
ADRODDIAD SCAA
SBAR REPORT

Sefyllfa / Situation

The Strategic Development and Operational Delivery Committee (SDODC) is asked to request assurance from the lead Executive Director for the corporate risks in the attached report that these are being managed effectively.

Cefndir / Background

Effective risk management requires a ‘monitoring and review’ structure to be in place to ensure that risks are effectively identified and assessed, and that appropriate controls and responses are in place.



(Risk Management Process, ISO 31000)

The Board's Committees are responsible for the monitoring and scrutiny of corporate level risks within their remit. They are responsible for:

- Seeking assurance on the management of risks on the Corporate Risk Register (CRR) and providing assurance to the Board that risks are being managed effectively and report areas of significant concern, for example, where risk appetite is exceeded, lack of action, etc.
- Reviewing corporate and operational risks over tolerance and, where appropriate, recommend the 'acceptance' of risks that cannot be brought within Hywel Dda University Health Board's (HDdUHB) risk appetite/tolerance to the Board.
- Identify through discussions any new/emerging risks and ensure these are assessed by management.
- Signpost any risks outside of its remit to the appropriate HDdUHB Committee.
- Use risk registers to inform meeting agendas.

These risks have been identified by individual Directors via a top-down and bottom-up approach and are either:

- Associated with the delivery of the Health Board objectives; or
- Significant operational risks escalated that are of significant concern and require corporate oversight and management.

Each risk on the CRR has been mapped to a Board level Committee to ensure that risks on the CRR are being managed appropriately, taking into account the gaps, planned actions and agreed tolerances, and to provide assurance to the Board through their update report on the management of these risks.

The Board has delegated a proportion of its role of scrutiny of assurances to its Committees to make the most appropriate and efficient use of expertise. Therefore, Committees should also ensure that assurance reports relevant to the principal risks are received and scrutinised and an assessment made as to the level of assurance it provides, taking into account the validity and reliability i.e. source, timeliness, methodology behind its generation and its compatibility with other assurances. This will enable the Board to place greater reliance on assurances, if they are confident that they have been robustly scrutinised by one of its Committees; and provide them with greater confidence regarding the likely achievement of strategic objectives, as well as providing a sound basis for decision-making. It is the role of Committees to challenge where assurances in respect of any component are missing or inadequate. Any gaps should be escalated to the Board.

The process for risk reporting and monitoring within HDdUHB is outlined at Appendix 1.

Asesiad / Assessment

The SDODC Terms of Reference reflect the Committee's role in providing assurance to the Board that principal risks are being managed effectively by the risk owners (Executive Leads).

The Terms of Reference state the Committee's purpose is:

2.6 Seek assurance on the management of principal risks within the Board Assurance Framework (BAF) and Corporate Risk Register (CRR) allocated to the Committee and provide assurance to the Board that risks are being managed effectively and report any areas of significant concern e.g. where risk tolerance is exceeded, lack of timely action.

2.7 Recommend acceptance of risks that cannot be brought within HDdUHB's risk appetite/tolerance to the Board through the Committee Update Report.

2.8 Receive assurance through Sub-Committee Update Reports that risks relating to their areas are being effectively managed across the whole of the Health Board's activities (including for hosted services and through partnerships and Joint Committees as appropriate).

There are two risks assigned to the Committee from the 20 risks currently identified on the CRR. These risks can be found at Appendix 2.

Changes Since Previous Report

Total Number of Risks	2	
New risks	0	
De-escalated/Closed	1	*Note 1*
Increase in risk score ↑	0	
No change in risk score →	2	*Note 2*
Reduction in risk score ↓	0	

Note 1 – Risk de-escalated
One risk has been de-escalated since the previous meeting:

Risk Reference & Title	Date risk identified	Lead Director	Previous Risk Score	Update	Target Risk Score
1707 - Risk of breaching Capital Resource Limit (CRL) in 2023/24 due to additional significant demands for funding	01/05/23	Director of Strategy and Planning	**4x2=8**	The Executive Risk Group held in October 2023 agreed to de-escalate the risk following funding approval from Welsh Government (WG) on 29 August 2023 to support the remedial works at Withybush Hospital (WH) relating to Reinforced Autoclaved Aerated Concrete (RAAC), as well as the phased fire works on the site.	**4x2=8**

Note 2 - No change in risk score
There have been no changes to the following risk scores since reported at the previous meeting:

Risk Reference & Title	Date risk identified	Lead Director	Current Risk Score	Update	Target Risk Score
1657- Risk to delivery of Ministerial Priorities relating to planned care recovery	12/05/23	Director of Operations	**4x5=20** (Reviewed 21/11/23)	The combined impact of current uncertainty regarding resources available to support recovery actions, the availability of workforce and /or externally provided	**4x3=12**

ambitions 23/24 due to demand exceeding capacity				capacity and the continuing impact of post-pandemic urgent and emergency care pathway pressures (as reflected in risk 1027 - Risk to delivery of timely urgent and emergency care due to demand exceeding current capacity - current risk score 20) which continue to impact upon available capacity for some specialties, all pose a risk to the achievement of ministerial priority expectations in relation to achievement of planned care recovery ambitions. The Annual Plan approved by the Board in March 2023 and supporting performance trajectories highlight significant gaps between the resourced level of capacity reflected in the plan, and the anticipated level of patient demand to be treated during 2023/24. Whilst further proposals have been submitted to WG to access retained recovery funding not yet allocated to health boards, revised delivery trajectories cannot be confirmed without a supporting resource plan. Subject to availability of additional resources to support additional recovery actions, it is anticipated that a significant volume of additional activity will need to be supported by externally provided solutions, either via neighbouring health boards or via the independent sector insource / outsource market. External capacity cannot be confirmed prior to formal market testing. Limits to staffing resource	

				both in theatre, and post operatively, was a challenge before the COVID-19 pandemic. Whilst positive progress has been achieved in increasing outpatient activity and capacity to levels comparable with pre-pandemic volumes, significant staffing deficits within the anaesthetic medical and theatre staffing teams continues to limit the volume of elective operating sessions undertaken and therefore continues to limit progress in expanding overall activity levels to match/exceed pre-pandemic levels. The continuing legacy of the COVID-19 pandemic on the urgent and emergency care pathway demand and the consequential impact on available bed capacity continues to limit sufficient capacity to support activity expansion plans in key specialties. Whilst no Health Board is currently achieving ministerial milestones in respect of planned care recovery, HDdUHB achieved the greatest progress compared to other Health Boards across Wales during 2022/23 and has achieved a significant improvement in the volumes of Stage 1 patients waiting more than 52 weeks and total pathway patients waiting more than 104 weeks. Analysis of the impact on waiting times in respect of ministerial priorities, and without application of the recovery funding has been	

				completed and continually reviewed. The analysis was due to be considered at the October 2023 Board Seminar, the outcomes of which will determine the requirement for a QIA to be undertaken to explore the impact on patients.	
1350 - Risk of not meeting the 75% Single Cancer Pathway (SCP) waiting times target for 2022 - 2026 due to diagnostics capacity and delays at tertiary centre	04/02/22	Director of Operations	**4x3=12** (Reviewed 21/11/23)	The impact of COVID-19 has increased the risk of being unable to meet the target. The delays are caused by diagnostic capacity issues across the Health Board. The main area of concern is Radiology. A decrease in capacity for appointments and results reporting within radiology, current vacancies and planned annual leave within two of the four Health Board sites. Patients have been offered alternative appointments on other sites; however some patients have not agreed to attend and have requested an appointment close to home. Cancer performance has been variable since Quarter 3 2021/22, the consequence of which resulted in short term planned and unplanned step down of activity within outpatients and planned surgery. This led to an increase in the backlog of patients waiting in excess of 63 days. Performance since April 2022 has been variable due to treating higher volumes of patients particularly in the Urology and Lower Gastrointestinal (LGI) pathways. Performance was at 46% in September 2023. Performance is on	**4x2=8**

				trajectory to improve in Quarter 4 2023/24 and landing at 70% March 2024.	

The 'heat map' below includes the risks currently aligned to SDODC:

HYWEL DDA UHB RISK HEAT MAP					
	LIKELIHOOD →				
IMPACT ↓	RARE 1	UNLIKELY 2	POSSIBLE 3	LIKELY 4	ALMOST CERTAIN 5
CATASTROPHIC 5					
MAJOR 4			1350 (→)		1657 (→)
MODERATE 3					
MINOR 2					
NEGLIGIBLE 1					

Argymhelliad / Recommendation

The SDODC Committee is asked to **RECEIVE ASSURANCE** that:

- All identified controls are in place and working effectively.
- All planned actions will be implemented within stated timescales and will reduce the risk further and/or mitigate the impact if the risk materialises.
- Challenge where assurances are inadequate.

This in turn will enable SDODC to provide the necessary assurance (or otherwise) to the Board through its Update Report, that HDdUHB is managing these risks effectively.

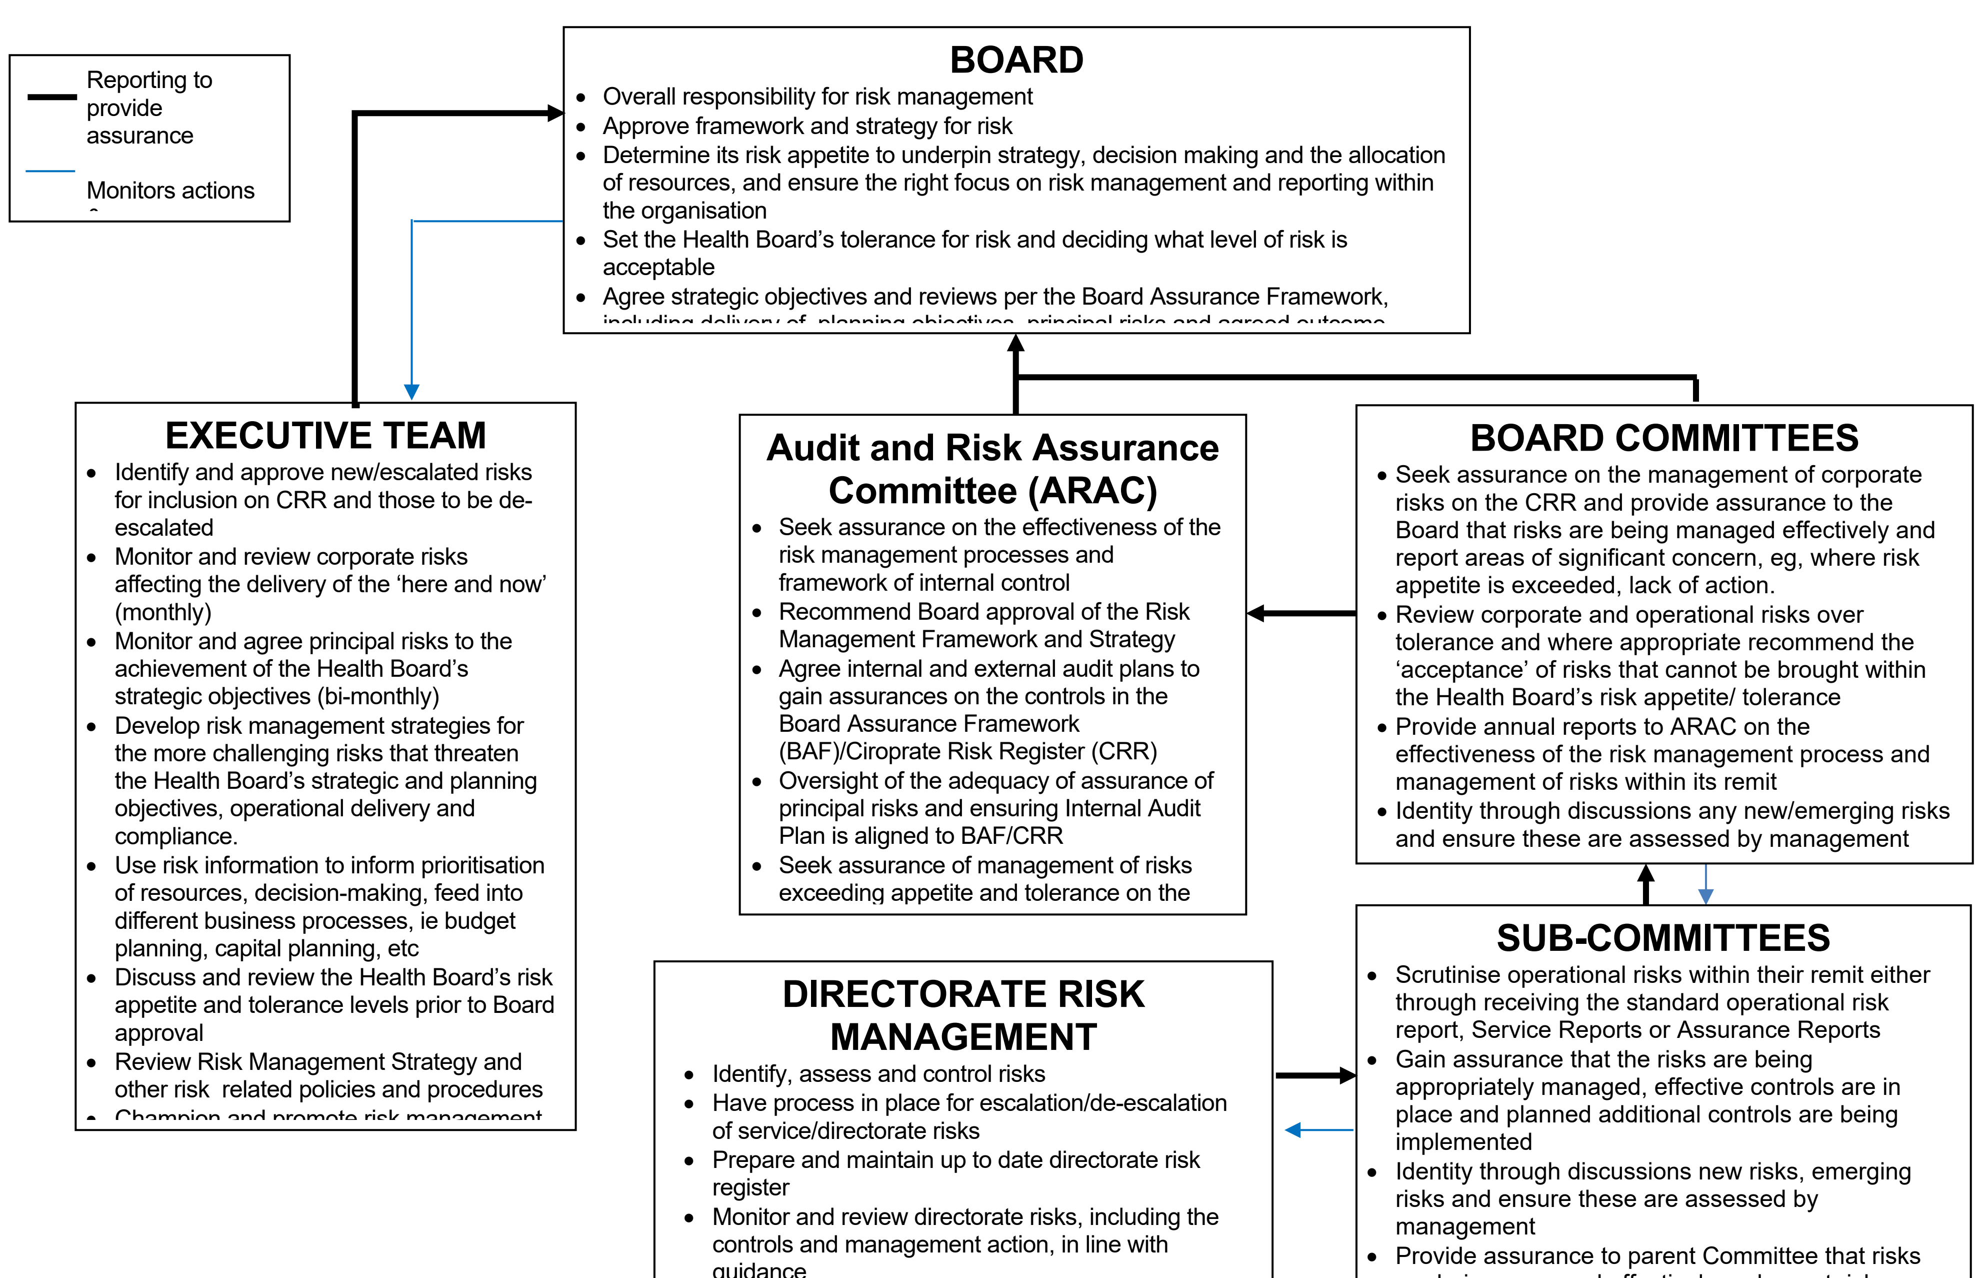
Appendix 1 – Committee Reporting Structure



CORPORATE RISK REGISTER SUMMARY NOVEMBER 2023

Risk Ref	Risk (for more detail see individual risk entries)	Risk Owner	Domain	Tolerance Level	Previous Risk Score	Risk Score Nov-23	Trend	Target Risk Score	Risk on page no...
1657	Risk to delivery of Ministerial Priorities relating to planned care recovery ambitions 23/24 due to demand exceeding capacity	Carruthers, Andrew	Safety - Patient, Staff or Public	6	**5×4=20**	**5×4=20**	→	**3×4=12**	3
1350	Risk of not meeting the 75% SCP waiting times target for 2022 - 2026 due to diagnostics capacity and delays at tertiary centre	Carruthers, Andrew	Quality/Complaints/Audit	8	**3×4=12**	**3×4=12**	→	**2×4=8**	6

Assurance Key:

3 Lines of Defence (Assurance)		
1st Line	Business Management	Tends to be detailed assurance but lack independence
2nd Line	Corporate Oversight	Less detailed but slightly more independent
3rd Line	Independent Assurance	Often less detail but truly independent

Key - Assurance Required		*NB Assurance Map will tell you if you have sufficient sources of assurance not what those sources are telling you*
	Detailed review of relevant information	
	Medium level review	
	Cursory or narrow scope of review	

Key - Control RAG rating	
LOW	Significant concerns over the adequacy/effectiveness of the controls in place in proportion to the risks
MEDIUM	Some areas of concern over the adequacy/effectiveness of the controls in place in proportion to the risks
HIGH	Controls in place assessed as adequate/effective and in proportion to the risk
INSUFFICIENT	Insufficient information at present to judge the adequacy/effectiveness of the controls

Date Risk Identified:	May-23	Executive Director Owner:	Carruthers, Andrew	Date of Review:	Nov-23
Strategic Objective:	5. Safe and sustainable and accessible and kind care	Lead Committee:	Strategic Development and Operational Delivery Committee	Date of Next Review:	Dec-23

Risk ID:	1657	Principal Risk Description:	There is a risk of non-delivery of ministerial priority expectations in relation to delivery of planned care recovery ambitions through 2023/24. This is caused by by current uncertainty regarding resources available to support recovery actions, the availability of workforce and /or externally provided capacity, and the continuing impact of post-pandemic urgent and emergency care (UEC) pathway pressures (as reflected in risk 1027) which continue to impact upon available capacity for some specialties. This could lead to an impact/affect on the quality of care provided to patients, significant clinical deterioration, delays in care and poorer outcomes, increasing pressure of adverse publicity/reduction in stakeholder confidence and increased scrutiny from regulators.
Does this risk link to any Directorate (operational) risks?			1548, 180, 523, 525, 632, 958, 1083, 1027, 1628, 1629

Risk Rating:(Likelihood x Impact)	
Domain:	Safety - Patient, Staff or Public

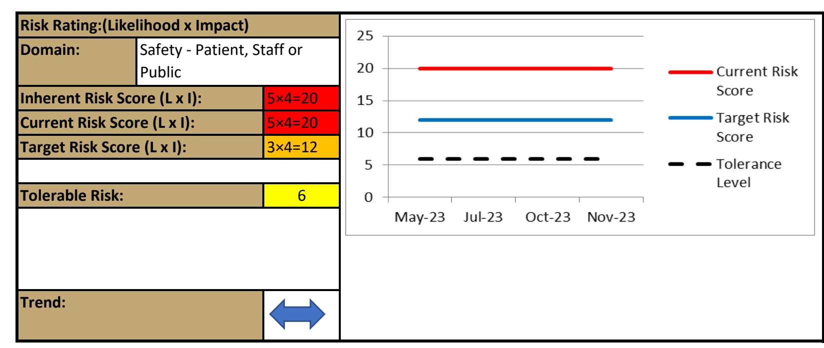
Current Risk Score (L x I):	5×4=20
Target Risk Score (L x I):	3×4=12
Tolerable Risk:	6
Trend:	⟷



Rationale for CURRENT Risk Score:

The combined impact of current uncertainty regarding resources available to support recovery actions, the availability of workforce and /or externally provided capacity and the continuing impact of post-pandemic urgent and emergency care pathway pressures (as reflected in risk 1027) which continue to impact upon available capacity for some specialties, all pose a risk to achievement of ministerial priority expectations in relation to achievement of planned care recovery ambitions. The Annual Plan approved by the Board in March 2023 and supporting performance trajectories highlight significant gaps between the resourced level of capacity reflected in the plan, and the anticipated level of patient demand to be treated during 2023/24. Whilst further proposals have been submitted to WG to access retained recovery funding not yet allocated to health boards, revised delivery trajectories cannot be confirmed without a supporting resource plan. Subject to availability of additional resources to support additional recovery actions, it is anticipated that a significant volume of additional activity will need to be supported by externally provided solutions, either via neighbouring health boards or via the independent sector insource / outsource market. External capacity cannot be confirmed prior to formal market testing. Limits to staffing resource both in theatre, and post operatively, was a challenge before the COVID pandemic. Whilst positive progress has been achieved in increasing outpatient activity & capacity to levels comparable with pre-pandemic volumes, significant staffing deficits within the Anaesthetic medical and theatre staffing teams continues to limit the volume of elective operating sessions undertaken and therefore continues to limit progress in expanding overall activity levels to match/exceed pre-pandemic levels. The continuing legacy of the COVID-19 pandemic on urgent and emergency care pathway demand and the consequential impact on available bed capacity continues to limit sufficient capacity to support activity expansion plans in key specialties. Whilst no health board is currently achieving ministerial milestones in respect of planned care recovery, HDUHB has achieved the greatest progress compared to other health boards across Wales during 2022/23 and has achieved a significant improvement in the volumes of Stage 1 patients waiting > 52 weeks and total pathway patients waiting > 104 weeks.

Analysis of the impact on waiting times in respect of ministerial priorities, and without application of the recovery funding has been completed and continually reviewed. The analysis is due to be considered at the October Board Seminar, the outcomes of which will determine the requirement for a QIA to be undertaken to explore the impact on patients.

Rationale for TARGET Risk Score:

Across the UK, there is a significant challenge for health organisations in sustaining the recovery of planned care pathways post pandemic. The target score of 12 is based on the realistic assessment of the level of planned care work which could be achieved both internally across the UHB and via maximum utilisation of capacity available within the independent sector, should available resource levels support commissioning of activity to the level required.

Whilst efforts to make further progress towards the Ministerial Measures continue, the Health Board has signalled through its Annual Recovery Plan that full achievement of both the Stage 1 and Total pathway measures by the respective target dates is unachievable without additional enabling resource to support further recovery actions.

The tolerable risk (6) remains unchanged for the level highlighted during 2022/23 and reflects the longer term recovery ambitions of the Health Board to reduce waiting lists and length of wait to the lowest levels possible.

Key CONTROLS Currently in Place: (The existing controls and processes in place to manage the risk)
Comprehensive daily management systems in place to manage planned care risks on daily basis including multiple daily multi-site calls in times of escalation. # Prioritised review of patients based on an agreed risk stratification model. # Provision of dedicated elective beds on 3 sites. # The staffing position continues to be monitored on a daily basis in accordance with safe staffing principles. # Delivery plans in place supported by daily, weekly and monthly monitoring arrangements. # Escalation plans for acute and community hospitals (within limits of staffing availability). # Outpatient transformation programme in place with a continuing focus on alternatives to face to face delivery of outpatient care to enable increases in care volumes delivered. # Robust sickness absence management arrangements in place. # Comprehensive programme of outsourcing of planned care volumes in place utilising capacity available via independent sector providers. # Weekly review of outsourcing volumes and further opportunities progressed jointly by Planned Care and Commissioning teams. # Elective care delivery plan developed for inclusion within Annual Delivery Plan. # Additional Planned Care Recovery proposals submitted to WG May 2023.

Gaps in CONTROLS				
Identified Gaps in Controls : (Where one or more of the key controls on which the organisation is relying is not effective, or we do not have evidence that the controls are working)	**How and when the Gap in control be addressed** Further action necessary to address the controls gaps	**By Who**	**By When**	**Progress**
# Limited impact to date of the wider urgent and emergency care plan in reducing capacity pressures on acute sites and the ability to protect sufficient elective pathway capacity for elective patients. # Theatre staffing availability to support expansion of theatre capacity at required pace and level. # Timeliness of the All Wales Commissioning Framework to support rapid decision making and commissioning of independent sector activity levels when supported by non-recurrent funding released part-way through the year. # Sufficiency of Health records service capacity to support planned expansion of outpatient activity. # Sufficiency of Anaesthetic medical staffing capacity to support planned expansion of required operating lists.	Elective care delivery plan developed for inclusion within Annual Delivery Plan.	Jones, Keith	Completed	Plan complete and submitted within refreshed Annual Recovery Plan.
	Additional Recovery proposals submitted to WG May 2023 against WG £50m retained Recovery Fund	Jones, Keith	Completed	Additional proposals submitted. Outcome awaited.
	Opportunities to enhance dedicated elective pathway capacity across sites is dependent upon successful delivery of the transforming urgent and emergency care plan.	Jones, Keith	Completed	Partially Complete - Dedicated elective capacity in place at Prince Philip Hospital and Bronglais General Hospital. From October 2023, the day surgical unit at Withybush General Hospital has been re-established following its temporary utilisation as a medical bed surge area due to the RAAC project. Limited dedicated elective pathway capacity at Glangwili Hospital to support sufficient internal capacity for Urology & ENT surgery. Proposals for an alternative configuration of dedicated planned care capacity at Prince Philip Hospital are unable to be progressed due to overall pressure on bed capacity (part linked to the system-wide pressure associated with the WGH RAAC project).
	Workforce development and recruitment plan jointly developed between Planned Care & Workforce Team	Hire, Stephanie	~~30/06/2023~~ 30/08/2023	Continued progress achieved in recruitment of theatre staffing and consultant anaesthetic appointments, but levels remained below required WTE. Further review in August 2023.
	Subject to availability of additional resources to support additional recovery actions, access to sufficient external insource / outsource capacity will be dependent upon formal market testing	Hire, Stephanie	~~30/06/2023~~ ~~30/08/2023~~ 30/11/2023	WG allocation of additional recovery resources (confirmed 25 July 23) is significantly below the required level reflected in the Health Board's additional recovery proposals. Impact assessment has been undertaken, and due to be presented to October Board Seminar, outcomes of which will determine further progress against this action

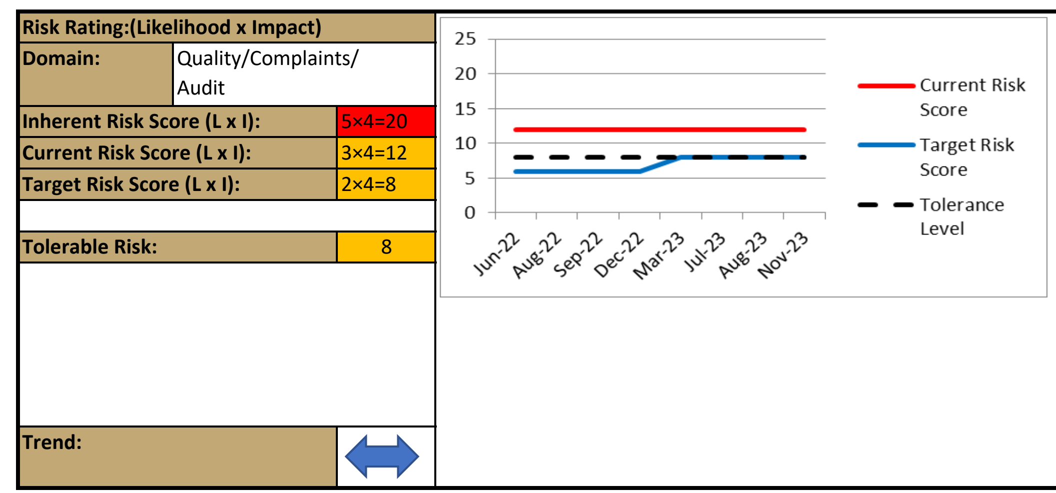
Executive Director Owner:	Carruthers, Andrew	Date of Review:	Nov-23
Lead Committee:	Strategic Development and Operational Delivery Committee	Date of Next Review:	Jan-24

Risk ID:	1350	Principal Risk Description:	There is a risk of the Health Board not being able to meet the 75% target for waiting times in the ministerial measures for 2022/26 for the Single Cancer Pathway (SCP). This is caused by Reduced capacity due to the impact of COVID-19 and our ability to meet the expected demand for diagnostics and treatment delays at our tertiary centre. The impact being an increased number of patients waiting in excess of 62 Days. This could lead to an impact/affect on increased number of patients waiting in excess of 62 days and meeting patient expectations in regard to timely access for appropriate treatment which could potentially lead to poorer outcomes and patient experience, adverse publicity/reduction in stakeholder confidence and increased scrutiny/escalation from Welsh Government.
Does this risk link to any Directorate (operational) risks?			1223, 114, 111, 1537, 1699, 1722, 1723

Risk Rating:(Likelihood x Impact)	
Domain:	Quality/Complaints/ Audit
Inherent Risk Score (L x I):	5×4=20
Current Risk Score (L x I):	3×4=12
Target Risk Score (L x I):	2×4=8
Tolerable Risk:	8
Trend:	⬌



Rationale for CURRENT Risk Score:

The impact of COVID-19 has increased the risk of being unable to meet the target. The delays are caused by diagnostic capacity issues across the health board . The main area of concern is Radiology. A decrease in capacity for appointments and results reporting within radiology, current vacancies and planned annual leave within two of the four health board sites. Patients have been offered alternative appointments on other sites, however some patients have not agreed to attend and have requested an appointment close to home.

Cancer performance has been variable since quarter 3 2021/22. The consequence of which resulted in short term planned and unplanned step down of activity within outpatients and planned surgery. This led to an increase in the backlog of patients waiting in excess of 63 days. Performance since April 2022 has been variable due to treating higher volumes of patients particularly in the Urology and LGI pathways. Performance was at 46% Sept 23. Performance is on trajectory to improve in Quarter 4 and landing at 70% March 2024.

Rationale for TARGET Risk Score:

The aim is to treat patients within target waiting times, which has now been confirmed as 75% non-adjusted 2022-2026.

The tolerance level will be met if plans to increase diagnostic capacity, utilising allocated recovery funding are realised. Publication of performance data by WG recommenced in Feb21 with health boards only reporting against the SCP, with no wait adjustment.

Key CONTROLS Currently in Place: (The existing controls and processes in place to manage the risk)
A Gi Improvement Group has been established . The aim is to implement the NOP for the GI Pathways. # Fully established cancer tracking team in place to allow patients to be proactively tracked through their pathways. # A new cancer dashboard developed by Informatics with the support of Business Intelligence (BI) SCP funding from the Wales Cancer Network. This is now live with access for Cancer Services staff and Service Managers, allowing MDTs to actively monitor tumour site specific patients on a SCP. # The health board have been piloting the use of Quarterly Planning and Monitoring reports developed by the NHS Executive since July 23. This has facilitated the development of targeted improvement plans per tumour site and subsequent weekly monitoring thus providing assurance of the robustness of plans. # Funding has now been secured and plans are being discussed to role this service out across all 3 counties. # As per the Wales Bowel Cancer Initiative, a successful FIT10 screening in the management of USC patients on a colorectal pathway was implemented in Jun20. A Straight to FIT test is being implemented within the health board, where depending on the result of the FIT test, as to whether an OPA or any further investigations are required, which will reduce the pathway by 14 days. On 6th April the health board introduced FIT10 screening into Primary care. This has resulted in a reduction in demand of 30% for first OPA. # Virtual appointments are being undertaken via digital solutions e.g.

Gaps in CONTROLS				
Identified Gaps in Controls : (Where one or more of the key controls on which the organisation is relying is not effective, or we do not have evidence that the controls are working)	**How and when the Gap in control be addressed** Further action necessary to address the controls gaps	**By Who**	**By When**	**Progress**
Anticipated significant gaps within key diagnostic services to address required levels of activity to support SCP. Key diagnostic information systems do not support effective demand / capacity planning. Need for the implementation of new, streamlined optimal clinical pathways to reduce diagnostic demand and expedite assessment pathways. Access to green pathways and tertiary centres fluctuates depending on COVID-19.	The Wales Cancer Network are employing Single Cancer Pathway (SCP) Project Managers for each health board across Wales to support the SCP work and the optimisation of the National Optimal Pathways	Humphrey, Lisa	Completed	Project Manager appointed and took up post in Apr22. This will be a 2 year fixed term appointment to run alongside the optimisation project. Request made 18th November to the WCN for sessions to develop and strengthen our Cancer Recovery plan and maximise optimum pathway opportunities
	Work with newly appointed Head of Radiology to: 1) explore outsourcing opportunities and internal solutions to increase capacity to appointments and reporting utilising non recurrent recovery money. 2) Investigating current capacity for diagnostics to ensure a 7-day turnaround as per the National Optimal Pathways.	Humphrey, Lisa	~~31/03/2023~~ ~~31/07/2023~~ ~~30/11/2023~~ 31/04/2023	Process in place to implement demand capacity modelling tool in line with SBUHB.

Attend Anywhere.
Weekly Cancer Watchtower meetings where services managers are in attendance. The function of this group is to monitor and address service demand, capacity and risk issues.
Monthly performance meetings with Welsh Government.
Trajectory performance plans have been developed for each tumour site by the relevant services, with regards to improving performance. This also includes Backlog Trajectory plans on how these improvements will be achieved.
Weekly monitoring of Urology diagnostic improvement trajectory via Cancer watchtower.
Cancer Pathway Review Panel has been implemented to identify any risk for those patients who have not received their treatment within 146 days.
Process in place that improves time for patients to first outpatient appointment to improve the 28 day performance target (all patients to be informed etc).
Continue to escalate concerns regarding tertiary centre capacity and associated delays.

Review access to green surgical pathways across all sites to include access to green critical care.	Humphrey, Lisa	Completed	As of March 2023, service now operating as at pre-covid capacity. Action complete.
Introduce a central point of contact for navigator as a pilot to coordinate radiology USC appointments and reporting from Mar22	Humphrey, Lisa	Completed	The Radiology Navigator took up post in April 22.
Each MDT to review and adopt recommended optimal tumour site specific pathways. (Timescales may change depending on COVID)	Humphrey, Lisa	~~31/03/2023~~ ~~30/09/2023~~ 31/03/2024	The Macmillan Cancer Quality Improvement Manager is working with the teams with regards to implementing the new pathways.
