

### PWYLLGOR DATBLYGU STRATEGOL A CHYFLENWI GWEITHREDOL STRATEGIC DEVELOPMENT AND OPERATIONAL DELIVERY COMMITTEE

DYDDIAD Y CYFARFOD: DATE OF MEETING:	27 June 2022
TEITL YR ADRODDIAD:	Corporate Risks Assigned to Strategic Development
TITLE OF REPORT:	and Operational Delivery Committee (SDODC)
CYFARWYDDWR ARWEINIOL: LEAD DIRECTOR:	Andrew Carruthers, Director of Operations
SWYDDOG ADRODD:	Joanne Wilson, Board Secretary
REPORTING OFFICER:	Charlotte Beare, Assistant Director of Assurance & Risk

Pwrpas yr Adroddiad (dewiswch fel yn addas) Purpose of the Report (select as appropriate)

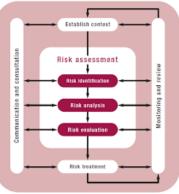

### Er Sicrwydd/For Assurance

### ADRODDIAD SCAA SBAR REPORT Sefyllfa / Situation

The Strategic Development & Operational Delivery Committee (SDODC) is asked to request assurance from the lead Executive Director for the corporate risks in the attached report that these are being managed effectively.

### Cefndir / Background

Effective risk management requires a 'monitoring and review' structure to be in place to ensure that risks are effectively identified and assessed, and that appropriate controls and responses are in place.

(Risk Management Process, ISO 31000)

The Board's Committees are responsible for the monitoring and scrutiny of <u>corporate level</u> risks within their remit. They are responsible for:

• Seeking assurance on the management of principal risks on the Board Assurance Framework (BAF)/Corporate Risk Register (CRR) and providing assurance to the Board that risks are being managed effectively and report areas of significant concern, for example, where risk appetite is exceeded, lack of action, etc.

- Reviewing principal and operational risks over tolerance and, where appropriate, recommend the 'acceptance' of risks that cannot be brought within Hywel Dda University Health Board's (HDdUHB) risk appetite/tolerance to the Board.
- Provide annual reports to Audit and Risk Assurance Committee (ARAC) on the effectiveness of the risk management process and management of risks within its remit.
- Identity through discussions any new/emerging risks and ensure these are assessed by management.
- Signpost any risks outside of its remit to the appropriate HDdUHB Committee.
- Use risk registers to inform meeting agendas.

These risks have been identified by individual Directors via a top down and bottom up approach and are either:

- Associated with the delivery of the Health Board objectives; or
- Significant operational risks escalated that are of significant concern and require corporate oversight and management.

Each risk on the CRR has been mapped to a Board level Committee to ensure that risks on the CRR are being managed appropriately, taking into account the gaps, planned actions and agreed tolerances, and to provide assurance to the Board through their update report on the management of these risks.

The Board has delegated a proportion of its role of scrutiny of assurances to its Committees to make the most appropriate and efficient use of expertise. Therefore, Committees should also ensure that assurance reports relevant to the principal risks are received and scrutinised and an assessment made as to the level of assurance it provides, taking into account the validity and reliability i.e. source, timeliness, methodology behind its generation and its compatibility with other assurances. This will enable the Board to place greater reliance on assurances, if they are confident that they have been robustly scrutinised by one of its Committees; and provide them with greater confidence regarding the likely achievement of strategic objectives, as well as providing a sound basis for decision-making. It is the role of Committees to challenge where assurances in respect of any component are missing or inadequate. Any gaps should be escalated to the Board.

The process for risk reporting and monitoring within HDdUHB is outlined at Appendix 1.

## Asesiad / Assessment

The SDODC Terms of Reference reflect the Committee's role in providing assurance to the Board that principal risks are being managed effectively by the risk owners (Executive Leads).

The Terms of Reference state the Committee's purpose is:

- 2.6 To seek assurance on the management of principal risks within the Board Assurance Framework (BAF) and Corporate Risk Register (CRR) allocated to the Committee and provide assurance to the Board that risks are being managed effectively and report any areas of significant concern e.g. where risk tolerance is exceeded, lack of timely action.
- 2.7 To recommend acceptance of risks that cannot be brought within the UHBs risk appetite/tolerance to the Board through the Committee Update Report.
- 2.8 Receive assurance through Sub-Committee Update Reports that risks relating to their areas are being effectively managed across the whole of the Health Board's activities

(including for hosted services and through partnerships and Joint Committees as appropriate).

There are 2 risks currently aligned to SDODC (out of the 15 that are currently on the CRR). These risks can be found at Appendix 2.

### **Changes Since Previous Report**

NEGLIGIBLE 1					

## <u>Note 1 – New Risks</u>

Since the previous report in February 2022, 2 new risks have been added to the CRR:

Risk	Lead Director	New/ Escalated	Date	Reason
Risk 1350 - Risk of not meeting the 75% waiting times target for 2022/26 due to diagnostics capacity and delays at tertiary centre	Director of Operations	New	03/03/22	This risk has replaced the 633 – (Ability to meet the 75% target for waiting times for 2020/21 for the new Single Cancer Pathway (SCP)). The impact of COVID-19 has increased the risk of being unable to meet the target. The delays are caused by diagnostic

				capacity issues across the
				health board in line with the
				infection control guidance
				that still remains in place.
				The main area of concern is
				radiology. A decrease in
				capacity for appointments
				and results reporting within
				radiology, due to COVID-19
				related sickness, current
				vacancies and planned
				annual leave within two of the
				four health board sites.
				Patients have been offered
				alternative appointments on
				other sites, however some
				patients have not agreed to
				attend and have requested
				an appointment close to
				home.
				Cancer performance has
				been on a downward
				trajectory for quarter 3 during
				2021/22. This is due to the
				increase in COVID-19 related
				sickness, management of
				COVID-19 related flows and
				the overall impact on
				diagnostic and critical care.
				The consequence of which
				resulted in short term
				planned and unplanned step
				down of activity within
				outpatients and planned
				surgery. This has led to an
				increase in the backlog of
				patients waiting in excess of
				63 days. Performance is now
				at 57% (Mar 2022) and is not
				likely to improve over the
				next 3 months whilst the
				health board addresses the
Risk 1407 -	Director of	Now	17/06/22	current backlog.
		New	11/00/22	This risk was approved via
delivery of	Operations			Chair's action on 17/06/22 to
planned care				replace the previous risk
services set out				1048 which related to
in the Annual				planned care delivery in
Recovery Plan				2021/22. The combined
and achievement				impact of urgent and
of WG Ministerial				emergency care pressures
Priorities for the				(as reflected in Risk 1027)
reduction in				and a continuing significant

elective waiting       deficit in available staffing         times to target       and financial resources         levels during       continues to limit available         2022/23.       capacity for elective, urgent         and cancer pathway patients       and, as a consequence,         represents a risk to delivery       of Ministerial Measures for         the reduction in waiting lists /       times during 2022/23.         Limits to staffing resource       both in theatre, and post         operatively, was a challenge       before the COVID-19         pandemic. The impact of       increasing unscheduled care         pressures continues to limit       capacity to be dedicated to         elective and surgical       pathways.         An elective care recovery       plan has been developed         which seeks to increase       outpatient and treatment         capacity beyond levels       delivered prior to the         pandemic. However, the       capacity required during the         2022/23 year to enable       achievement of the         winisterial Measures       exceeds that currently         available. Whilst outsourcing       programmes are continuing		
levels during       continues to limit available         2022/23.       capacity for elective, urgent         and cancer pathway patients       and, as a consequence,         represents a risk to delivery       of Ministerial Measures for         the reduction in waiting lists /       times during 2022/23. # Note 2 - De-escalated/Closed/Change of lead committee

Since the previous report, two corporate risks aligned to this Committee have been deescalated.

Risk Ref & Title	Lead Director	Closed/ De-escalated	Date	Reason	
------------------	------------------	-------------------------	------	--------	--

633 - Ability to meet the 75% target for waiting times for 2020/21 for the new Single Cancer Pathway (SCP)	Director of Operations	Closed	02/03/22	The Executive Risk Group agreed to close this risk following a review of the risk by the service. The new risk (1350) reflects the current context and issues and the new ministerial measure for the single cancer pathway.
1342 - Inability to plan and respond effectively to the pandemic due to changes in COVID testing and reporting policy	Director of Operations	Closed	13/04/22	This risk was reviewed by the Executive Risk Group, who agreed to reduce the risk score to 9 and close the risk as no further action can be taken to mitigate the risk and responding to COVID-19 demand has become part of normal business.
1048 - Risk to the delivery of planned care services set out in the Annual Recovery Plan 2021/22	Director of Operations	Closed	17/06/22	This was closed via Chair's action on 17/06/22 as it relates to delivery of planned care services in 2021/22. A new risk (1407) has been articulated for 2022/23 (see section above).
1027 - Delivery of integrated community and acute unscheduled care services	Director of Operations	Realigned to QSEC	01/06/22	The Executive Risk Group agreed on 01/06/2022 to realign risk 1027 to the Quality, Safety and Experience Committee (QSEC) for future reporting.

### Argymhelliad / Recommendation

SDODC is asked to seek assurance that:

- All identified controls are in place and working effectively.
- All planned actions will be implemented within stated timescales and will reduce the risk further and/or mitigate the impact, if the risk materialises.
- Challenge where assurances are inadequate.

This in turn will enable SDODC to provide the necessary assurance (or otherwise) to the Board through its Update Report, that HDdUHB is managing these risks effectively.

# **RISK ASSESSMENT - FREQUENCY OF REVIEW**

RISK SCORED	DEFINITION	ACTION REQUIRED (GUIDE ONLY)	MINIMUM REVIEW FREQUENCY	
15-25	Extreme	Unacceptable. Immediate action must be taken to manage the risk. Control measures should be put into place which will have an effect of reducing the impact of an event or the likelihood of an event occurring. A number of control measures may be required.	This type of risk is considered extreme and should be reviewed and progress on actions updated, at least monthly.	
8-12	High	Very unlikely to be acceptable. Significant resources may have to be allocated to reduce the risk. Urgent action should be taken. A number of control measures may be required.	This type of risk is considered high and should be reviewed and progress on actions updated at least bi-monthly.	
4-6	Moderate	Not normally acceptable. Efforts should be made to reduce risk, providing this is not disproportionate. Establish more precisely the likelihood & harm as a basis for determining the need for improved measures.	This type of risk is considered moderate and should be reviewed and progress on actions updated at least every six months.	
1-3	Low	Risks at this level may be acceptable. If not acceptable, existing controls should be monitored & reviewed. No further action or additional controls are required.	This type of risk is considered low risk and should be reviewed and progress on actions updated at least annually.
