

## PWYLLGOR ADNODDAU CYNALIADWY SUSTAINABLE RESOURCES COMMITTEE

| DYDDIAD Y CYFARFOD:<br>DATE OF MEETING:  | 28 February 2023   |
|--|--|
| TEITL YR ADRODDIAD:<br>TITLE OF REPORT:  | Corporate Risk Report  |
| CYFARWYDDWR ARWEINIOL:<br>LEAD DIRECTOR: | Huw Thomas, Director of Finance<br>Andrew Carruthers, Director of Operations |
| SWYDDOG ADRODD:<br>REPORTING OFFICER:    | Charlotte Wilmshurst, Assistant Director, Assurance and Risk                 |

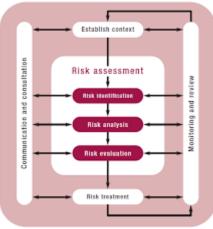

Pwrpas yr Adroddiad (dewiswch fel yn addas) Purpose of the Report (select as appropriate) Er Sicrwydd/For Assurance

### ADRODDIAD SCAA SBAR REPORT Sefyllfa / Situation

The Sustainable Resources Committee is asked to request assurance from the identified Executive Director that the corporate risks in the attached report at Appendix 1, are being managed effectively.

## Cefndir / Background

Effective risk management requires a 'monitoring and review' structure to be in place to ensure that risks are effectively identified and assessed, and that appropriate controls and responses are in place.

(Risk Management Process, ISO 31000)

The Board's Committees are responsible for the monitoring and scrutiny of <u>corporate-level</u> risks within their remit. As such, they are responsible for:

• Seeking assurance on the management of corporate risks included in the Corporate Risk Register (CRR) and providing assurance to the Board that risks are being

managed effectively, reporting areas of significant concern - for example, where risk appetite is exceeded, lack of action etc;

- Reviewing principal and operational risks over tolerance and, where appropriate, recommending the 'acceptance' of risks that cannot be brought within Hywel Dda University Health Board's (HDdUHB's) risk appetite/ tolerance to the Board through the Committee Update Report;
- Providing annual reports to Audit and Risk Assurance Committee (ARAC) on the effectiveness of the risk management process and management of risks within their remit;
- Identifying through discussions any new/ emerging risks, and ensuring these are assessed by management;
- Signposting any risks outside their remit to the appropriate HDdUHB Committee;
- Using risk registers to inform meeting agendas.

The Executive Team has agreed the content of the CRR. These risks have been identified via a top-down and bottom-up approach.

Each risk on the CRR has been mapped to a Board-level Committee to ensure that risks are being managed appropriately, taking into account gaps, planned actions and agreed tolerances, and to provide assurance regarding the management of these risks to the Board through Committee Update Reports.

The Board has delegated a proportion of its role in scrutinising assurances to its Committees in order to make the most appropriate and efficient use of expertise. Therefore, Committees should also ensure that assurance reports relating to principal risks are received and scrutinised, and an assessment made as to the level of assurance they provide. The reports should consider the validity and reliability of each assurance in terms of source, timeliness and methodology. Robust scrutiny by its Committees will enable the Board to place greater reliance on assurances and will provide the Board with greater confidence in the likelihood of achieving strategic objectives, in addition to ensuring a sound basis for decision-making. It is the role of Committees to provide challenge where missing or inadequate assurances are identified and to escalate any gaps in assurance to the Board (Appendix 1).

## Asesiad / Assessment

The Sustainable Resources Committee Terms of Reference state that it will:

- 2.7 Seek assurance on the management of principal risks within the Board Assurance Framework (BAF) and Corporate Risk Register (CRR) allocated to the Committee and provide assurance to the Board that risks are being managed effectively and report any areas of significant concern e.g. where risk tolerance is exceeded, lack of timely action.
- 2.8 Recommend acceptance of risks that cannot be brought within the UHBs risk appetite/tolerance to the Board through the Committee Update Report.
- 2.9 Receive assurance through Sub-Committee Update Reports and other management/task & finish group reports that risks relating to their areas are being effectively managed across the whole of the Health Board's activities (including for hosted services and through partnerships and Joint Committees as appropriate).

There are 3 risks assigned to the Committee from the 18 risks currently identified on the CRR. The principal risks to the Health Board's strategic objectives have been reported to the Board from September 2021.

The 3 corporate risks have been entered onto a '*risk on a page*' template, which includes information relating to the strategic objective, controls, assurances, performance indicators, and action plans to address any gaps in controls and assurances. Due to the sensitive nature of risk 1352 – Risk of business disruption and delays in patient care due to a cyber-attack, the detail is being reported to in-committee to provide discussion and assurance. Detail on the 2 remaining corporate risks assigned to SRC are included in Appendix 2.

## **Changes Since Previous Report**

| Total Number of Risks                 | 3 |          |
|---------------------------------------|---|----------|
| New risks                             | 0 |          |
| De-escalated/Closed                   | 0 |          |
| Increase in risk score $\rightarrow$  | 0 |          |
| No change in risk score $\rightarrow$ | 3 | See Note |
| Reduction in risk score $\rightarrow$ | 0 |          |

1

## <u>Note 1 - No change in risk score</u>

Since the previous report, there have been no changes to the following 3 risks.

| Risk<br>Reference<br>& Title  | Executive<br>Director  | Previous<br>Risk<br>Score<br>(Dec-22) | Current<br>Risk<br>Score | Date of<br>Review | Update<br>(Extracted<br>from Datix)   |
|---|------------------------|---------------------------------------|--------------------------|-------------------|---|
| 1432 - Risk<br>to the<br>delivery of<br>the Health<br>Board's<br>draft<br>interim<br>Financial<br>Plan for<br>2022/23 | Director of<br>Finance | 5×5=25                                | 5×5=25                   | 10/02/23          | Financial planning<br>assumptions have been<br>assessed assuming up to 12<br>months of "Low" COVID-19<br>prevalence (defined as<br>COVID-19 circulating in the<br>community, perhaps at levels<br>of Summer 2021, but lower<br>severity (equivalent to Omicron<br>variant)). Whilst the operational<br>responses and corresponding<br>financial impact of the<br>pandemic during 2020-2022<br>has provided a sound basis for<br>modelling scenarios, it should<br>be acknowledged that this<br>"Low" scenario may not be the<br>case throughout the year,<br>which may have resource<br>implications. WG funding<br>streams are partly confirmed,<br>however there will be a<br>reliance on the success of bids<br>for specific funding to support<br>the specific exceptional costs,<br>transitional COVID-19 support<br>in response to the pandemic<br>and in the acceleration of the |

| 1352 - Risk<br>of business<br>disruption<br>and delays<br>in patient<br>care due to   | Director of<br>Finance    | 4×4=16 | 4×4=16 | 09/02/23 | Health Board's Strategy. A<br>strategic transformation of our<br>operating model is required to<br>make the shift in services that<br>are required to deliver<br>workforce and finance<br>sustainability - this is a medium<br>term outlook, but will impact<br>the in-year position.<br>Through our revised planning<br>process, operational plans to<br>address the financial savings<br>gap and operational variation<br>have not provided sufficient<br>assurance to mitigate the<br>current financial trajectory.<br>Whilst the risk to the in-year<br>delivery of the forecast position<br>has reduced, the forecast<br>deficit of £59.0m remains<br>unacceptable to WG and has<br>led to an unsupportable<br>underlying deficit position<br>which will impact future years.<br>Detail provided to SRC In-<br>Committee |
|---|---------------------------|--------|--------|----------|---|
| a cyber-<br>attack<br>1335 - Risk<br>of being   | Director of<br>Operations | 4×3=12 | 4×3=12 | 04/01/23 | Currently across the Health<br>Board there is a considerable  |
| unable to<br>access<br>paper<br>patient<br>records at<br>the correct<br>time and<br>place in<br>order to<br>make the<br>right clinical<br>decisions |                           |        |        |          | variance in both practice and<br>process, operationally when<br>utilising and dealing with the<br>various types of records in use<br>throughout directorates,<br>services, and departments. The<br>current records management<br>methodology, results in a non-<br>standardised approach to<br>delivering effective records<br>management arrangements.<br>With a lack of agreed criteria in<br>terms of managing the record<br>during its life cycle from<br>creation, during retention and to<br>disposable. There is a<br>requirement for an investment  |

|  |  |  | in a modern-day solution and<br>an alteration to culture and<br>attitude that will embrace<br>change and technology<br>associated with a digital health<br>record (DHR), to manage the<br>risk. The Health Board has<br>selected its electronic document<br>management system (EDMS)<br>supplier. |
|--|--|--|---|
|--|--|--|---|

The Committee is requested not to devolve its responsibility for seeking assurances on corporate risks; however, it can reassign risks to another Board level Committee if it is agreed that it fits better within their remit.

The 'heat map' below includes the risks currently aligned to the Sustainable Resources Committee.

| HYWEL DDA RISK HEAT MAP |           |   |  |          |          |  |  |  |  |  |

| NEGLIGIBLE<br>1         |           |   |  |          |          |  |  |  |  |  |

## Argymhelliad / Recommendation

The Sustainable Resources Committee is requested to:

- Seek assurance that all identified controls are in place and working effectively;
- Seek assurance that all planned actions will be implemented within stated timescales and will reduce the risk further and/ or mitigate the impact, if the risk materialises;
- Challenge where assurances are inadequate.

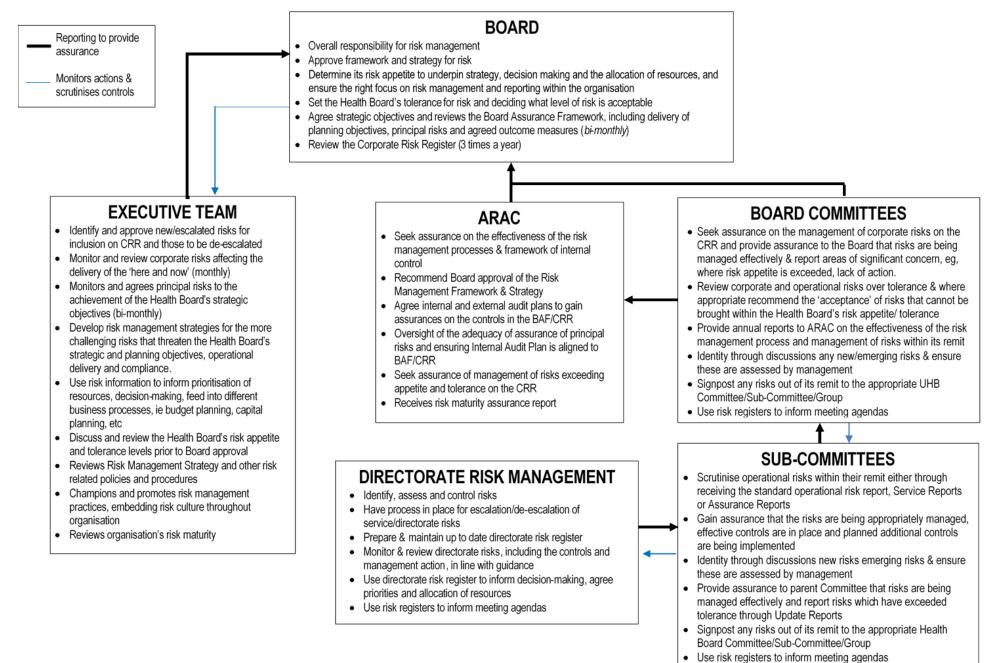

Subsequently, this will enable the Committee to provide the necessary onward assurance to the Board, through its Committee Update Report, that HDdUHB is managing these risks effectively.

# **RISK ASSESSMENT - FREQUENCY OF REVIEW**

| RISK SCORED | DEFINITION | ACTION REQUIRED (GUIDE ONLY)   | MINIMUM REVIEW FREQUENCY   |
|-------------|------------|--|--|
| 15-25       | Extreme    | Unacceptable. Immediate action must be taken to manage the<br>risk. Control measures should be put into place which will have<br>an effect of reducing the impact of an event or the likelihood of<br>an event occurring. A number of control measures may be<br>required. | This type of risk is considered extreme and should be reviewed and progress on actions updated, at least monthly.                |
| 8-12        | High       | Very unlikely to be acceptable. Significant resources may have<br>to be allocated to reduce the risk. Urgent action should be<br>taken. A number of control measures may be required.  | This type of risk is considered high and should be reviewed<br>and progress on actions updated at least bi-monthly.              |
| 4-6         | Moderate   | Not normally acceptable. Efforts should be made to reduce risk, providing this is not disproportionate. Establish more precisely the likelihood & harm as a basis for determining the need for improved measures.  | This type of risk is considered moderate and should be<br>reviewed and progress on actions updated at least every six<br>months. |
| 1-3         | Low        | Risks at this level may be acceptable. If not acceptable, existing controls should be monitored & reviewed. No further action or additional controls are required.   | This type of risk is considered low risk and should be reviewed and progress on actions updated at least annually.               |

## Assurance Key:

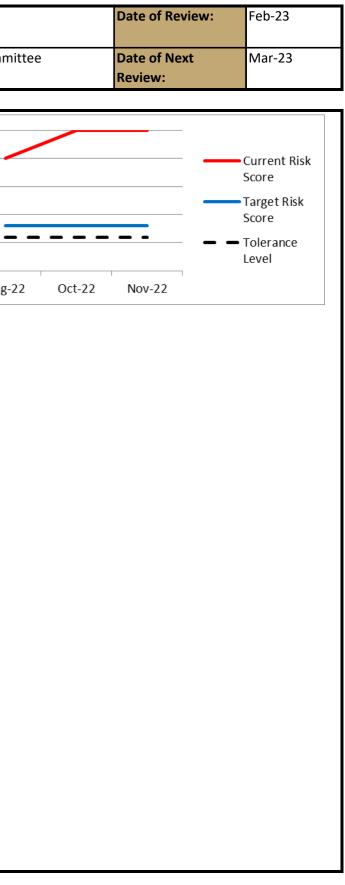

|          | 3 Lines of Defence (Assurance) |  |  |  |  |  |  |

#### Rationale for CURRENT Risk Score:

Financial planning assumptions have been assessed assuming up to 12 months of "Low" COVID-19 prevalence (defined as COVID-19 circulating in the community, perhaps at levels of Summer 2021, but lower severity (equivalent to Omicron variant)). Whilst the operational responses and corresponding financial impact of the pandemic during 2020-2022 has provided a sound basis for modelling scenarios, it should be acknowledged that this "Low" scenario may not be the case throughout the year, which may have resource implications. WG funding streams are partly confirmed, however there will be a reliance on the success of bids for specific funding to support the specific exceptional costs, transitional COVID-19 support in response to the pandemic and in the acceleration of the Health Board's Strategy. A strategic transformation of our operating model is required to make the shift in services that are required to deliver workforce and finance sustainability - this is a medium term outlook, but will impact the in-year position.

Through our revised planning process, operational plans to address the financial savings gap and operational variation have not provided sufficient assurance to mitigate the current financial trajectory.

Whilst the risk to the in-year delivery of the forecast position has reduced, the forecast deficit of £59.0m remains unacceptable to WG and has led to an unsupportable underlying deficit position which will impact future years.

### Rationale for TARGET Risk Score:

The Health Board needs to demonstrate that it is able to manage its financial position effectively, cognisant of the risks which are inherent in the delivery of safe and timely care. The current draft Financial Plan does not provide sufficient assurance of this and urgent management actions are required to address this.

Given the challenge in delivering the financial position this year, it is unlikely that the Health Board will achieve a risk which is in line with the tolerable risk for the year. Consequently, the target risk score exceeds the tolerable risk at this point. This is not an acceptable position, and further work is ongoing to manage this risk.

6. Opportunities Framework and Roadmap to Financial Sustainability, refreshed to identify alternative ways of working in response to COVID-19 that may result in cost reductions/formal savings schemes identified. Linked to Target Operating Model (TOM) workplan, which will be shaped by the Health Board's strategy, "A Healthier Mid and West Wales", and align to the design assumptions set out in that.

7. Accountability statements in relation to the Opening Directorate Budgets underpinning the draft interim Financial Plan for 2022/23 will issued to all budget holders in April 2022. The letters clarify that it is expected that all budget holders manage their services within their allocated budgetary envelope; that it is incumbent on all to ensure that expenditure, including the operational response to COVID-19, represents best value; and, that there is the expectation that these operational needs can be clearly demonstrated and that additional costs will reduce as and when decisions are made.

8. Performance against plan monitored through System Engagement Meetings with Services, including Performance, Quality and Financial information. To be improved through Improving Together.

 9. Implementation of systems for efficiency (Malinko, WellSky, Nurse Documentation system) are driving financial systems for control (Symbiotics, Caf M in Facilities and Estates, Allocate), alongside the Digital Strategy improving grip and control.

10. Weekly financial reporting to Executive Team, tracking week-onweek progress against key metrics.

11. Tactical TI Group and Steering TI Group established internally

### Rationale for CURRENT Risk Score:

Currently across the Health Board there is a considerable variance in both practice and process, operationally when utilising and dealing with the various types of records in use throughout directorates, services and departments. The current records management methodology, results in a non-standardised approach to delivering effective records management arrangements. With a lack of agreed criteria in terms of managing the record during its life cycle from creation, during retention and to disposable. There is a requirement for an investment in a modern day solution and an alteration to culture and attitude that will embrace change and technology associated with a digital health record (DHR), to manage the risk. The Health Board has selected its electronic document management system (EDMS) supplier.

### Rationale for TARGET Risk Score:

The implementation of a full DHR will support and resolve a number of issues currently being experienced across the Health Board. Prior to making a record digital all services and identified IAO's will have to undertake a full review of their records management arrangements and work in conjunction with a robust criteria to ensure processes follow a standardised approach. A DHR resolves any issues we may currently be experiencing with regards the lack of storage capacity, provision of records in line with GDPR requirements, the ability to facilitate additional clinical requests, the transition to a virtual world, cost benefits, as well as many others. To assist implementation a requirement for adaptation to working practice and a considerable change in culture for future success.

This will require<br>agreement on future record management<br>arrangements, required resources and<br>project support going forward as an essential<br>precursor to the delivering the scanning<br>phase of the project plan. This will be largely<br>driven by individual information asset owners<br>providing comprehensive schedules of<br>information assets under their responsibility. | Carruthers,<br>Andrew | Completed  |  |

### Progress

Ã,£300k per annum for three years made available to prime the project to include acquiring premises to facilitate a scanning bureau along with appointment of a project manager. A paper outlining the direction of travel and key steps to be taken was presented to executive team 28 July 2021 and this was broadly supported. A project implementation plan along with specification for acquiring scanners is being progressed.

SBAR submitted to Executive Team in October 2022 outlining the plan for future records management arrangements. Further discussions are now required to fully implement the transition and move records to one centralised locality.
