Dyddiad/Date:

Dear

The result of your recent blood test, which screens for Down's syndrome shows you have a LOW CHANCE of having a baby with Down's syndrome. The cut-off point, which would place you in a higher chance, is 1:150 or below, Due to this blood test results, NIPT or amniocentesis is not recommended.

This result does not mean you have no chance of having a baby with Down's syndrome, but the likelihood is low.

Information about this blood result is in the "information for women pack" which, was in your booking pack and on [www.antenatalscreening.org](http://www.antenatalscreening.org).

If you wish to discuss this blood test result, further please telephone 01267227592.

The result of your blood test is enclosed please show this to your midwife at your next antenatal appointment.

Yours Sincerely

Midwife – ANC

Dear

The result of your recent blood test which screens for Down's Edwards' and Patau's syndromes shows you have a LOW CHANCE of having a baby with any of the above syndromes. The cut off point which would place you in a higher chance is 1:150 or below. Due to this blood test results, NIPT or amniocentesis is not recommended.

This result does not mean that you have no chance of having a baby with Down's Edwards' or Patau's syndrome, but the likelihood is low.

Information about this blood result is in the "Information for Women Pack" which, was in your booking pack and on [www.antenatalscreening.org](http://www.antenatalscreening.org).

If you wish to discuss this blood test result further please telephone 01267227592

The result of your blood test is enclosed please show this to your midwife at your next antenatal appointment.

Yours sincerely
