

Distal Radius Fracture in Adults Questionnaire

1. Which hospital do you work at?

Glangwili General Hospital, Carmarthen
--

2. Does your hospital accept or manage trauma patients?

Yes	YES	No	
-----	-----	----	--

3. Is your hospital a designated major trauma centre?

Yes		No	NO
-----	--	----	----

4. How many adults with closed distal radius fracture does your hospital manage in a month?

ESTIMATED 15-20

5. Does your department have a written guideline for the investigation and management of potential closed distal radius fracture following trauma?

Yes	
No	NO
Verbal Only	

6. If yes, where is your guideline taken from? (For example, BOAST, locally derived guideline etc.)

INDIVIDUAL CONSULTATION PRACTICE

7. For patients requiring a closed manipulation of their fracture that present *during the day*, where is this manipulation carried out?

Plaster room	YES
In the emergency department (excluding resuscitation area)	
Resuscitation bay in the emergency department	
Operating Theatre	
Other (please specify)	

Please specify:

8. Which specialty is responsible for the initial manipulation of the fracture?

Emergency Medicine	YES	Trauma and Orthopaedics		Other (please specify)	
--------------------	-----	-------------------------	--	------------------------	--

9. What form of analgesia is most commonly used for the manipulation procedure?

Regional nerve blockade	
Regional intravenous anaesthesia (Bier's block)	
Local haematoma block	YES

Please specify:

Procedural sedation and analgesia (please specify)	
General anaesthetic	
No specific method of analgesia specified	

10. If a Bier's block is performed, which specialty performs the Bier's block?

Emergency Medicine		Anaesthetics	
Trauma and Orthopaedics		Other (please specify)	

Please specify:

11. What grade of doctor is most commonly responsible for performing the Bier's Block?

N/A

12. For patients requiring a closed manipulation of their fracture that present *overnight*, where is this manipulation carried out?

Plaster room	YES
In the emergency department (excluding resuscitation area)	
Resuscitation bay in the emergency department	
Operating Theatre	
Other (please specify)	
Manipulation not carried out overnight	

Please specify:

13. Overnight, which specialty is responsible for the initial manipulation of the fracture?

Emergency Medicine	YES	Manipulation not carried out overnight	
Trauma and Orthopaedics		Other (please specify)	

Please specify:

14. Overnight, what form of analgesia is used for the manipulation procedure?

Regional nerve blockade	
Regional intravenous anaesthesia (Bier's block)	
Local haematoma block	YES
Procedural sedation (please specify)	
General anaesthetic	
No specific method of analgesia specified	
Manipulation not carried out overnight	

Please specify:

15. If patients do not receive manipulation out-of-hours where and when do they return?

<i>Where</i>		<i>When</i>	
Emergency Department		Following morning	
Fracture clinic	YES	Next working day (i.e. on Monday if seen over the weekend)	
Plaster room		Next available routine fracture clinic	

16. Following presentation to hospital with a distal radius fracture, how soon after the injury are patients seen in the Fracture Clinic? VARIES

Within 24 hours	
Within 48 hours	
Within 72 hours	
More than 3 days later
