

**Penally- Asylum Seekers**  
**Site visit 18/9/20- Infection Prevention assessment**

Issue	Action
<p>1.Fabric of buildings/ décor in poor condition on Penally site.</p> <p>A cleaning schedule has been put in place by the management team for the onsite cleaners with the SOP covering all of the areas raised. We have a maintenance team on site undertaking the necessary repairs and installing the required items. Ventilation and heating is also being addressed prior to each accommodation unit being occupied.</p>	<p>To prevent this environment from becoming contaminated and a cross infection issue then the cleaning resource and hours allocated to cleaning /disinfection need to be appropriate within the cleaning SOP i.e frequent cleaning of toilets/showers /wash hand basins /floors/communal areas and frequently touched surfaces.</p> <p>Maintenance to look to improve minor compromises in the environment as minimum. Ventilation with windows that can open and heating in rooms via radiators – electric</p>
<p>2. Covid19 Prevention</p> <p>No plans by Home office/ Clear Springs to implement covid risk pathways on site ( green/amber/red) or segregate dormitories into covid bubbles or segregate parts of the camp for covid reduction.</p> <p>Posters reminding people about 2M distancing and all necessary markings have been put in place.</p> <p>We have a risk assessment in place re Covid which include the issues raised as well as the actions to be taken should someone, staff or service users, show symptoms.</p> <p>Posters with information about symptoms and what to do – provided by PHW have been put in place.</p> <p>2 x thermometers have been sourced and are being used on site daily to take temperature.</p>	<p>Communal areas including dining area to have measurement of spacing and maximum number of attendees on posters on doors and marshalled by site team. Social distancing and prevention of large groups /huddles reminders by staff /poster etc in all languages. Posters and 2M floor reminders in key areas e.g meal queues / wash room</p> <p>Look to have marshals at meal times</p> <p>Stagger meal times as dining room may not take any more than 30 at a time –good flow in and out of dining area – please maintain strict flow.</p> <p>Monitoring of Asylum seekers for temperature /covid like illness – process in place for temp monitoring and escalation process – Risk assessment to be provided to [REDACTED] by [REDACTED]</p> <p>Isolation area on site</p> <p>Posters to indicate when to refer oneself for medical assessment on camp i.e unwell/ cough/temp/ loss smell and taste etc</p> <p>[REDACTED] currently having difficulty accessing thermo scan devices? any support on this</p>
<p>3.Test and trace considerations</p> <p>A list of new arrivals and their details has been sent to [REDACTED] and lists of arrivals, prior to arrival will be sent for any new arrivals. We have a full onsite signing in and out sheet/log. Space is available as required for MTU.</p>	<p>Accurate list of names of all accommodation and when off site.</p> <p>As camp currently, being treated as one unit = up to 250 men,any Covid issues will require whole camp lockdown and potential of all site screening. In the event of a covid incident Test and trace process will require list of all names of men and dob's</p> <p>Available space for MTU or empty officers mess that could be used for covid screening with adequate flows in and out</p>

### Site visit 18/9/20- Infection Prevention assessment

<p><b>4.Isolation facilities</b></p> <p>Mobile toilets and extra showers have been ordered and will be delivered and installed prior to breaching 1:5 – i.e. 1 toilet and 1 shower per 5 people.</p> <p>Roof repairs have been logged and allocated.</p>          <p>Lidded bins have been ordered. Clinical waste bags have been ordered.</p>  <p>Hand sanitiser dispensers and signage has been put in place on site.</p>	<p>X 1 building has 13 single rooms with wash hand basin this should be kept for isolation purposes. Only 1 toilet on this wing.</p> <p><b>Recommend</b> procurement of commodes for this area to maintain isolation principles and rooms prepared/cleaned as isolation wing before attendees arrive next week.</p> <p>1-2 other buildings that could be used as single isolation area or x2 redrooms could be utilised in this situation. Another building with individual rooms x5 needs roof repairs but could be another isolation block - ? roof repairs to be escalated. Thin carpets in many isolation areas - these would need to be removed /deep cleaned/disinfected.</p> <p><b>UVC technology utilised in each isolation room after cleaning and disinfection would be a recommendation given the poor condition of the buildings and isolation facility.</b></p> <p>Resources /equipment for isolation processes for Asylum seekers with possible communicable infections process.</p> <p>PPE stock( gloves/aprons/gowns/masks/visors) FFP3 masks if required would need further discussion/guidance with HB</p> <p>Vital sign monitoring equip- thermometer / Portable Blood pressure /oxygen saturation probe.</p> <p>Door signs indicating if the isolation is for respiratory / droplet or contact precautions</p> <p>Documentation /medical on site file</p> <p>Disposable cutlery / crockery</p> <p>Linen / towels/ disposable hygiene wipes / toiletries</p> <p><u>Clinical waste stream and process implemented at site ( stock of clinical waste bags)</u></p> <p>Lidded/foot operated bins for clinical waste bags for all individual isolation rooms and infirmary area plus additional contingencies in other buildings - in excess of 25 bins</p> <p>Hand sanitiser dispensers and soap dispensers</p> <p>Paper towel dispensers in infirmary and all isolation room contingency</p> <p>Disinfection wipes in infirmary and all isolation contingency</p> <p>Note the 13 single room contingency area as an isolation facility would need 2 of these rooms assigned to a clean store (equipment/linen) and a dirty room for cleaning equipment down – storing used linen/waste for short period. The</p>
