Subject: Building a healthier future after covid engagement

Hi,

I am a Pembrokeshire County Councillor for the Letterston ward. Since the social media release of the Building a healthier future after COVID-19 engagement exercise I have already been contacted by concerned residents. I will use my role as a community leader to encourage as many people as possible to share their views, but I am concerned about how to ensure everyone can get involved. I represent a ward with many retired and older residents who are not always on social media, or comfortable with responding via online methods. I appreciate it's a very difficult time to be launching an engagement exercise while we are still under covid restrictions, but I would like to know if there are any plans to give people an opportunity for face to face engagement, in a covid safe way.

I would also be grateful if I could have some paper copies of the documents to give to some of my residents. I am happy to collect them if needed.

Best wishes

Michelle

Cllr Michelle Bateman

County Councillor for Letterston

Cabinet Member for Housing

Pembrokeshire County Council
