

FOI.10524 - Attachment 1

The UHB provides, within the tables below, the number of children and adults combined that have been diagnosed with the prevalence of Fibromyalgia, hospital location by County and gender, as recorded on the UHB's Welsh Patient Administration System (WPAS).

As a timeframe was not provided within your request, the data has been provided for the calendar years 2018 to 2022.

Carmarthenshire					
Gender	2018	2019	2020	2021	2022
Female	384	410	292	346	378
Male	40	41	24	35	31
Indeterminate	0	*	0	0	0

Ceredigion					
Gender	2018	2019	2020	2021	2022
Female	40	66	40	42	51
Male	3	*	*	6	6
Indeterminate	0	0	0	0	0

Pembrokeshire					
Gender	2018	2019	2020	2021	2022
Female	192	155	140	200	172
Male	25	17	6	10	12
Indeterminate	*	0	*	0	*

Please note:- The data only provides the number of patients that have been admitted to all UHB hospitals and where this diagnosis has been recorded by the consultant. It does not identify if this was the reason they were admitted.
