

Reference:	FOI.18074.25
Subject:	Accident/injury statistics
Date of Request:	13 August 2025

Requested:

Is there any chance of getting the same comparable data for the year 2024?

Follow up to FOI.17918:

I'm looking to get some information about hospital admissions as a result of vehicular injury/fatalities at Glangwili hospital for the years 2019 and 2023 (ideally before and after covid) - any age, any gender.

Response:

Hywel Dda University Health Board (UHB) has relied upon the free text fields within its Welsh Patient Administration System (WPAS) and has searched for any information it holds based on a number of categories, including:

'Road Traffic Accident' (RTA)	'Lorry'	'Scooter'
'Road Traffic Collision' (RTC)	'Bus'	'Truck'
'Car'	'Tractor'	'Vehicle'
'Crash'	'Quad'	'Ship'
'Bike' (includes motor bikes)	'Train'	'Helicopter'
'Bicycle'	'Boat'	
'Cycle' (includes motorcycle)	'Plane'	

The UHB confirms that there were eighty two (82) admissions to Glangwili General Hospital (GGH), as a result of a vehicular injury/fatality, during the 2024 calendar year.
