

Reference:	FOI.21330.26
Subject:	Cardiographs
Date of Request:	14 August 2026

Requested:

We would like to place a Freedom of Information request, wishing to obtain an Install Base report for cardiographs (ECG recording devices) at your NHS trust.

Please could you provide the information broken down by individual hospital site (where applicable), rather than as a single trust-wide total. Where your organisation operates more than one hospital, we would be grateful for a separate entry for each site.

1. For each hospital site, we are specifically looking for the following:
 - a. Hospital name:
 - b. Number of cardiographs on site:
 - c. Make and model of each cardiograph:
 - d. Commission date (year):
 - e. Planned replacement date (year):
 - f. Do you operate a paper-based or digital ECG workflow?
 - g. Do you have an ECG management system?
If yes, please state the make/model

Response:

1a. – e. Hywel Dda University Health Board (UHB) provides the requested information at Attachment 1.

1f. The UHB uses both paper based and digital requests for Electrocardiograms (ECGs). However, requests are predominantly paper based.

1g. The UHB does not have an electronic ECG management system, results are paper based.
