

Reference:	FOI.21450.26
Subject:	Cow's milk allergy guideline
Date of Request:	26 August 2026

Requested:

I would like to request information regarding the cow's milk allergy guideline for Hywel Dda Health Board. Please provide:

1. The date on which the current guidance is scheduled to be reviewed, renewed, updated, or otherwise reconsidered.
2. Details of any planned review currently scheduled.
3. Whether there are any discussions, proposals, or plans to bring forward an earlier review than currently scheduled.
4. The team, department, committee, or individual(s) responsible for conducting or overseeing the review.
5. Any published or internal timetable for the review process.

Response:

1. Hywel Dda University Health Board (UHB) confirms that its Policy 517 - Management of nutritionally based infant feeding conditions and their appropriate prescribing, contains overarching guidance relating to the management of a Cow's Milk Protein Allergy (CMPA), which has a review date of 24 November 2026.
2. The review of Policy 517 is currently in progress. To date it has undergone an initial review and update, with comments sought from Dr Kausik Khan, Consultant Paediatrician as the allergy lead. The Policy is proceeding through the review process and will be shared with wider stakeholders for consultation before being finalised.
3. Not applicable. The review is on schedule to be completed by 26 November 2026.
4. The UHB's Nutrition and Dietetics Department, overseen by the Nutrition and Hydration Group are responsible for conducting and/or overseeing the review.
5. The UHB does not hold a timetable for the review process. The review date is published on the policy.
