

<b>Reference:</b>	FOI.1056.19
<b>Subject:</b>	Home oxygen fire incidents and fatalities
<b>Date of Request:</b>	29 June 2019

**Requested**

I know from the Home Oxygen Service (HOS) providers in England, there is a monthly report delivered to the CCGs relating to Serious Incidents Requiring Investigation (SIRI), previously known as Serious Untoward incidents (SUI), and/or Serious Events of an Adverse Nature (SEAN). It is my hope that a similar report is sent to each of the LHBs in Wales. With the assumption this is the case, I am requesting the following information from these reports:

1. The number of incidents/events resulting in a fatality for each year
2. The number of incidents/events involving a fire for each year
3. The number of incidents/events involving oxygen equipment and a fire for each year
4. The number of incidents/events involving oxygen equipment, a fire and a fatality for each year

Please provide the information in the form shown below:

Year	Incidents Involving Oxygen Equipment and Fire	Incidents Involving Oxygen Equipment, a Fire and a Fatality
2017		
2016		
2015		
2014		
2013		

**Response:**

Hywel Dda University Health Board (UHB) confirms no incidents or events involving oxygen equipment, a fire and/or a fatality are recorded on the UHB's DATIX incident reporting system for the calendar years 2013 to 2017, at the time of your request.
