

Reference:	FOI.1179.19
Subject:	NICE guidance DG34 tumour profiling for breast cancer
Date of Request:	18 July 2019

Requested

We are looking specifically at diagnostics - NICE Guidance - DG34 - tumour profiling for breast cancer, as a recent example.

We would like to understand any procurement plans you have in place as a result of this? Including dates, procurement route (open, restricted), regime (whether light touch regime, standard OJEU), likely weightings (quality vs price), or via NHS Supply Chain or other framework provider?

Response:

Hywel Dda University Health Board (UHB) confirms the NHS Shared Service Partnerships (NWSSP) procurement department has an all Wales agreement with Genomic Health Inc, providing the OncotypeDX test which has been used successfully for over 10 years.
