

Reference:	FOI.667.19
Subject:	Peripheral intravenous cannulas
Date of Request:	3 May 2019

Requested

Which peripheral IV cannulas you purchase for the administration of chemotherapeutic agents:

- Supplier
- Brand
- Volume per annum of gauge size(s)

Response:

Hywel Dda University Health Board (UHB) is unable to provide the details of intravenous cannulas purchased solely for the administration on chemotherapeutic agents as the UHB's procurement systems does not record this detail. Stocks are ordered and stored centrally and dispersed to departments upon request.

During the 2018/19 financial year the UHB purchased 5,650 22g gauge intravenous cannulas from BBraun.
