

<b>Reference:</b>	FOI.8331.22
<b>Subject:</b>	Printing devices
<b>Date of Request:</b>	24 February 2022

**Request and response:**

We are currently updating data on your Trust's printing devices (infrastructure hardware) and would appreciate your help. Can you please complete the fields below with what you currently hold?

Hywel Dda University Health Board (UHB) provides the information requested below.

**Standard Printers**

Number of printers: 890

Main supplier: Hewlett Packard

Contract end date: The UHB confirms that it does not have contracts for standard printers.

Annual spend £'s 2020-21: £179,056.00

**MFD Printers**

Number of printers: 198

Main supplier: Canda

Contract end date: The UHB confirms that there are various contract end dates, which have been provided within Attachment 1.

Please note: Some of the contracts detailed within the attachment have lapsed; however, the UHB continues to pay a monthly charge.

Annual spend £'s 2020-21: £329,936.00

Definitions - MFD Printers - A Multi-Function Device (MFD) is a machine that can print, copy and scan. These devices have faster print speeds and allow additional functionality such as scan to email. Secure print and follow-me printing are two of the key features of the new devices.
