

Reference:	FOI.17918.25
Subject:	Vehicular injury/fatalities statistics
Date of Request:	28 July 2025

Requested:

I'm looking to get some information about hospital admissions as a result of vehicular injury/fatalities at Glangwili hospital for the years 2019 and 2023 (ideally before and after covid) - any age, any gender.

Response:

Hywel Dda University Health Board (UHB) has relied upon the free text fields within its Welsh Patient Administration System (WPAS) and has searched for any information it holds based on a number of categories, including:

'Road Traffic Accident' (RTA)	'Lorry'
'Road Traffic Collision' (RTC)	'Bus'
'Car'	'Tractor'
'Crash'	'Quad'
'Bike' (includes motor bikes)	'Train'
'Bicycle'	'Boat'
'Cycle' (includes motor cycle)	'Plane'
'Scooter'	'Ship'
'Truck'	'Helicopter'
'Vehicle'	

Therefore, the UHB provides within the table below, the number of hospital admissions to Glangwili General Hospital (GGH), as a result of a vehicular injury/fatality during the 2019 to 2023 calendar years.

Years	Number
2019	74
2020	43
2021	58
2022	63
2023	72
Total	210
