

Stakeholder response from St. Thomas's Surgery, Haverfordwest.

Received 31/01/2023 via Sharepoint:

Dear [REDACTED]

I am responding on behalf of the Partnership at St Thomas Surgery, Haverfordwest.

Representative of the practice have met with members of the Health Board team and discussed the options that the Health Board are considering for the Solva Surgery GMS contract.

We understand that the continuation of the practice with a GMS contractor seems unlikely as you have had no expressions of interest.

Thus, the options are a managed Health Board practice or dispersal of the Registered patients to adjacent practices.

On the basis of the modelling provided by your team and the number of patients allocated to our practice, we would not object to dispersal being the option decided upon by the Health Board. We believe that we can physically accommodate that number of patients, and also manage the spike in activity that a block transfer would involve.

We would welcome the cooperation offered by the Health Board in this transfer, if that is the decided outcome.

Yours sincerely
